Dennis David

Site Reliability Operations Engineer

Kraków, Poland · +48 787 793 194 · dennisdavid1991@gmail.com
linkedin.com/in/arnolddennis · github.com/Arnolddennis

Azure-focused cloud engineer with 8+ years of professional experience, including 2+ years in L2/L3 production operations. Diagnose platform incidents, guide application service restoration and execute Azure CLI changes across Linux, Windows and Kubernetes environments. Build actionable alerts, operational runbooks and controlled automation for enterprise workloads.

TECHNICAL SKILLS

Azure and systems: Azure CLI, VMs, App Services, AKS, Azure SQL, Storage, Azure Arc; Linux (Ubuntu/RHEL/CentOS), Windows Server

Monitoring: Datadog, Azure Monitor, Log Analytics, Application Insights, Workbooks, Prometheus, Grafana

Automation and delivery: Bash, PowerShell, Python, Logic Apps, Azure Automation, REST APIs; Azure DevOps, GitHub Actions, Docker, Kubernetes, Git

Infrastructure and security: Terraform, ARM/Bicep, VNets, NSGs, private endpoints, Azure Firewall, RBAC, managed identity, Key Vault

AWS: Hands-on exposure; foundational knowledge of EC2, Lambda and CloudFormation

PROFESSIONAL EXPERIENCE

Senior Cloud Engineer

Apr 2024 – Present

LTIMindtree · Azure Monitoring and DevOps · Kraków, Poland

- Respond to L2/L3 incidents across Azure VMs, App Services, AKS and databases; correlate alerts, logs and deployment changes to isolate faults and guide application service restoration.
- Execute Azure CLI diagnostics, remediation and resource changes during production incidents and planned infrastructure updates; validate changes with application, infrastructure and security teams.
- Reduced manual incident-resolution effort by **approximately 40%** through Logic Apps, Azure Automation runbooks, PowerShell and Bash.
- Develop actionable alerts, dashboards, standard operating procedures (SOPs) and runbooks using Azure Monitor, Log Analytics, Application Insights, Prometheus and Grafana.
- Support Linux/Windows hardening and patching; troubleshoot AKS ingress, health probes, load balancing and scaling to maintain application availability.
- Manage secure infrastructure changes through Terraform and ARM/Bicep; apply RBAC, Key Vault, private endpoints, NSGs and Azure Firewall controls.
- Contribute to root-cause investigations and post-incident improvements; maintain Azure DevOps/GitHub Actions pipelines with SonarQube and Snyk checks and extend hybrid visibility with Azure Arc.

Team Leader and IT Trainer

Jun 2023 – Feb 2024

Concentrix · Katowice, Poland

- Coordinated technical support escalations across teams and customer stakeholders, aligning support activities with operational priorities and service-quality expectations.
- Defined performance metrics, quality standards and targeted action plans to track support quality and guide operational improvements.
- Delivered technical training and maintained reusable knowledge-base guidance, supporting consistent troubleshooting and reducing avoidable operational errors.

Dennis David / Site Reliability Operations Engineer

ADDITIONAL PROFESSIONAL EXPERIENCE

IT Project Specialist

Jun 2022 – Feb 2023

Capgemini · Katowice, Poland

- Supported Azure cloud-migration initiatives involving IaaS/PaaS services, hybrid integration components and containerized workloads; contributed to engineering design and troubleshooting reviews.
- Provisioned and monitored cloud infrastructure using Azure Monitor, Log Analytics workspaces and platform alerts to improve availability and performance visibility.
- Worked with engineering teams supporting Docker-based microservices and Kubernetes/AKS environments to investigate infrastructure and application issues.
- Documented Azure AD/RBAC access models, connectivity diagnostics and reusable application and infrastructure support procedures for technical teams.

IT and Engineering Business Head

Feb 2014 – Dec 2018

Fluidtech Engineers India Pvt. Ltd. · Chennai, India

- Led cross-functional IT and engineering initiatives supporting industrial machinery, manufacturing operations, customer projects and production systems.
- Implemented cloud-connected equipment monitoring and operational dashboards to track uptime, fault indicators, quality metrics and production performance.
- Coordinated controlled software, firmware, HMI/SCADA and MES/ERP changes across engineering, production and planning teams; maintained backup and continuity procedures.

SELECTED PROJECT

Azure Self-Healing SRE Platform

View on GitHub

- Built a portfolio implementation routing Azure Monitor common-schema alerts through Logic Apps to an Azure Automation PowerShell runbook, using managed identity and scoped RBAC.
- Prepared reusable Terraform for diagnostic logging, Application Insights, alerting, action groups and Web App restart remediation, with documentation for safe testing and production hardening.
- Added a Python service, Docker image, Kubernetes health probes, HPA, Prometheus ServiceMonitor, Flux reconciliation and Grafana/Prometheus definitions; validated changes through Jenkins and GitHub Actions.
- Implemented an optional AI-assisted incident-summary utility with a deterministic fallback to support evidence-based triage; retained engineer control over remediation decisions.

CERTIFICATIONS

Microsoft Certified: DevOps Engineer Expert (AZ-400)
Microsoft Certified: Azure Administrator Associate (AZ-104)

EDUCATION

Master’s in Material Science Engineering 2019–2021
Silesian University of Technology

Bachelor’s in Mechanical Engineering 2009–2013
Anna University

LANGUAGES AND WORK AUTHORIZATION
